fractions

Imagine you are to going to hold a picnic for the class. There will be 25 children and five adults attending. They can choose to have one stuffed pepper or two corn on the cob.

Q1. 20 people want stuffed peppers . What fraction of those attending the picnic want stuffed peppers ?

Q2. Of those wanting stuffed peppers 1/5 don't want side salad. How many don't want side salad?

Q3. 0.8 of the children want corn on the cob. How many children will have corn on the cob?

Q4. If the farmer's corn cob field measures 200m by 200m, how many square metres is this?

Extended Writing Piece

A national newspaper is running a campaign to encourage people to eat more vegetables for a whole month. They want to discover the nation's favourite vegetables and ask the kids to say what is their favourite vegetable, the best way to eat it and to describe how it tastes.

Write a short article for a newspaper giving your view about the campaign and explaining why.

I can write persuasively.
